

### Another Material-Handling Option

- 55-gallon drum tank made of heavy-gauge steel with fully welded seams that won't leak, melt, split, bulge or burn.
- Stronger than standard 55-gallon drums.
- Mounted on four casters for easy rolling and maneuverability, even when fully loaded.
- Built-in fork pockets provide easy transporting and handling by fork truck.
- Features 8" x 10" cleanout door for easy removal of settled solids.
- Valve in cleanout door permits fluids to drain out.
- Proudly designed and manufactured in the U.S.A.

**Specification:** TX-55PL

**Dimensions:** 31" L x 27" W x 46" H

**Shipping Weight:** 210 lbs.

**Wheels:** Two rigid and two swivel casters with 5" diameter phenolic, roller-bearing wheels

*Note: Engineering specifications subject to change without notice.*

### TWO BIRDS WITH ONE STONE

Pair the TX-55PL with a CECOR® drum top unit to easily convert it into a sump cleaner for removal of spent coolant and solids entrained in the fluids. Choose between a SE03-DT electric drum top and SA3-DT air drum top (sold separately) based on the convenience of your plant's power source. *Please note that these units don't filter like our Sump Shark® sump cleaner line.*
