

Another Material-Handling Option

- 55-gallon drum tank made of heavy-gauge steel with fully welded seams that won't leak, melt, split, bulge or burn.
- Stronger than standard 55-gallon drums.
- Vertical tank design makes it ideal for collecting and moving wet materials that slosh around when transported.
- Mounted on four casters for easy rolling and maneuverability, even when fully loaded.
- Gravity-drain valve in cleanout door permits fluids to drain out. 8" x 10" cleanout door allows for removal of settled solids.
- Built-in fork pockets provide easy transporting and handling by fork truck.
- Proudly designed and manufactured in the U.S.A.

Specification: TX-55PL

Dimensions: 31" L x 27" W x 46" H

Shipping Weight: 210 lbs.

Wheels: Two rigid and two swivel casters with 5" diameter phenolic, roller-bearing wheels

Note: Engineering specifications subject to change without notice.

TWO BIRDS WITH ONE STONE

Pair the TX-55PL with a CECOR® SA5-DT drum top unit to easily convert it into a sump cleaner for removal of spent coolant and solids entrained in the fluids.

Please note that these units don't filter like our Sump Shark® sump cleaner line.
